TECHNOLOGIES & TOOLS

Frontend & mobile

JavaScript, TypeScript, React, React Native, Expo, Redux Toolkit, TanStack Query, React Hook Form, Zod, HTML and CSS.

Backend & data

Node.js, Express, NestJS, REST, GraphQL, Socket.IO, Sequelize and MySQL.

Cloud & services

AWS: Amplify, Lambda, AppSync, Cognito, DynamoDB, S3 and CloudWatch. Firebase.

Quality & analytics

Jest, Testing Library, MSW, Cypress, Sentry and Amplitude.

Tools & versions

Git, Docker, Vite, Storybook, Jira, App Store Connect and Google Play Console.

Andrés Apolo

Full Stack Developer

React · React Native · TypeScript · Node.js · AWS

PROFESSIONAL SUMMARY

Full Stack developer with experience building web and mobile applications with React, React Native and TypeScript, and backend services with Node.js. I work with REST and GraphQL APIs, relational databases and serverless AWS services. I have contributed to products in payments, e-commerce, grant management and wellness, developing interfaces, business logic, integrations and automated tests.

PROFESSIONAL EXPERIENCE

Brightn

Full Stack Developer

July 2026 - Present

A mobile wellness app built with React Native and a serverless backend on AWS.

- Implemented identity verification and parental consent flows, connecting the app to AWS Lambda functions and AppSync resolvers.
- Built membership, consent, and onboarding interfaces with React Native and TypeScript.
- Added verification attempt limits and ownership checks, along with permission and configuration updates for consent emails.
- Fixed navigation, notification, and display issues; managed app versions and generated iOS and Android builds.

JustFund

Full Stack Developer

September 2025 - June 2026

A web platform for managing grants, applications, and review processes.

- Built React and TypeScript features for applicant profiles, filters, bulk selection, and review autosave.
- Implemented and refined PDF report generation in the Node.js backend, including application templates, contextual responses, and page numbering.
- Updated the invitation schema through database migrations to support an email-based flow.
- Fixed form validation, reminders, and review screen states, working with an Express backend, Sequelize, and MySQL.

EARLIER EXPERIENCE

De Una

Front-End Developer

August 2024 - August 2025

Mobile app and backoffice for the CNB module.

- Built CNB module features in the mobile app, using Redux Toolkit for state management and integrating GraphQL APIs.
- Built modular interfaces for the CNB commissions backoffice within a microfrontend architecture.
- Implemented unit tests with Jest and integration tests with Mock Service Worker, and took part in code reviews and coordination across frontend, backend, and product.

Cruz Verde

Front-End Developer

2023 - April 2024

Web and mobile products for Cruz Verde Chile.

- Built features for the shopping portal and wallet app with React and React Native, including integration of the wallet module into the app.
- Created and maintained reusable design components with React, React Native, Vite, and Storybook.
- Contributed to implementing and maintaining microservices with NestJS and CQRS architecture, monitored with Sentry and AWS CloudWatch.
- Wrote tests with Testing Library, Cypress, and MSW, and integrated analytics tools and Firebase.
